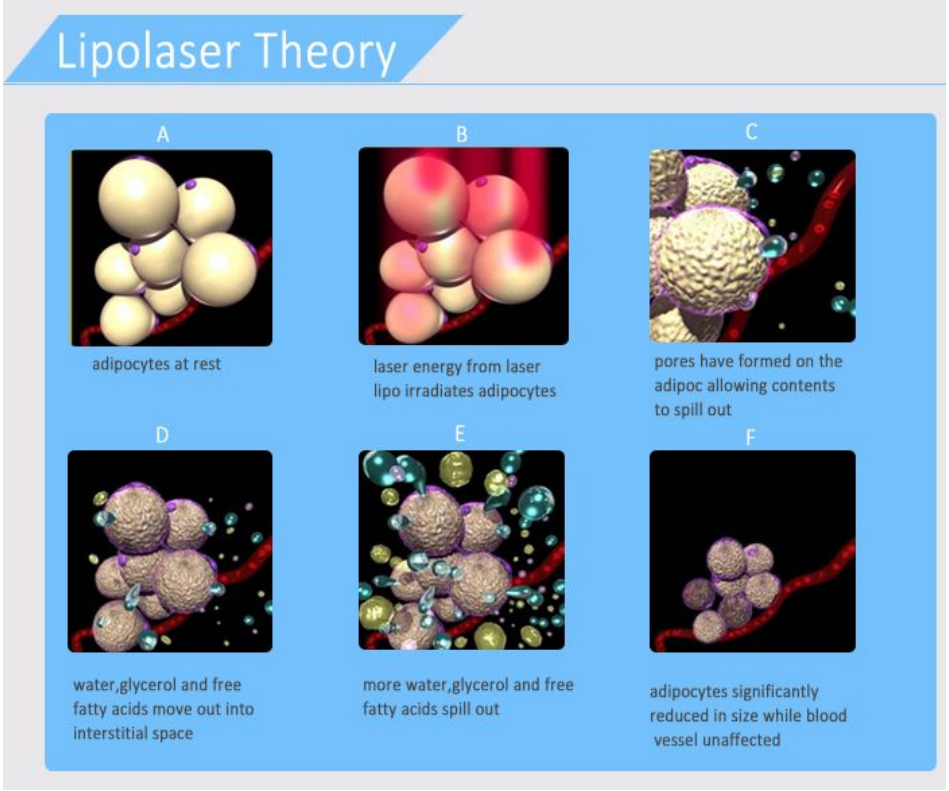
Chapter1: Principle and Application

I. Principle

Lipo Laser Machine involves the application of a highly sensitive laser to dissolve the fat deposits situated in the upper layers of the human skin. The energy emanating from the laser breaks up the fat cells to produce an oily material. This substance is either naturally eliminated through normally bodily processes or can be removed via a small incision made by the practicing surgeon. This leads to a permanent loss of fat as long as a healthy diet is maintained after treatment.

It penetrate into skin surface and stimulates the fat cell membranes, changing their permeability, the fat cells reduce their overall size and intracellular fat is released then the fatty trigly cerides flow out of the disrupted cell membranes and into the interstitial space, where they gradually pass through the body's natural metabolic functions with no harmful physiological effects, this process is resulting in inch loss of patients.

The subtlety of the treatment carries various advantages over the problems often associated with liposuction. Damaged blood vessels and allied physical risks are significantly reduced, and recovery time is condensed. It is also acknowledged that the laser itself is important in encouraging collagen production, thus strengthening the skin.



II. Application

Lipo laser is a non-invasive or minimally invasive procedure, depending on the amount of fat. And it is a method to get rid of the fat deposits that affect the aesthetic of the body contour and cause the cellulite "dimples" in the skin. And The laser method is for mild to moderate fat conditions and skin tightening. But it cannot remove larger amounts of dis-proportioned fat.

Chapter2: Safety Warnings

I. Electricity & Machinery Safety

1. The machine is either 110V or 220V. So please check the machine voltage before starting the machine.
2. Please Keep the voltage at stable condition.

II. Contraindication Safety

1. People with heart disease, High blood pressure, or configured cardiac Pacemaker.
2. People with acute inflammation, asthma, deep vein thrombosis, thyroncus, cancer.
3. People with hemorrhagic diseases, trauma or who is bleeding.
4. Pregnant women
5. Medical plastic artificial or metal parts inside the body such as metal teeth or Silicone breast implants.
6.People with abnormal immune system
7.People with Numb or insensitive to heat.
8.If you are feeling unwell,Prohibited in the ears,nose,eye throat and do not use this device in advance and tell your doctor.
9.Children under 12 years old are not allowed.

III. Treatment Safety

1. Treatment Time is less than 30mins/Body Part/Each Treatment.
2. The energy setting is from low to high gradually which should be subject to skin comfortableness for different people.
3. The patient had better wear the protective eye glasses.
4. If you cannot tolerant heat or uncomfortable, please stop the treatment in advance and turn to your doctor for help.

Chapter3: Installment and Use

I .Working Condition

Using at normal temperatures and pressure. Please do not stay in too cold, too hot, too dry and too wet.

II. Technical Parameters

Laser type diode wavelength – 635nm – 650nm
Energy output – 128 x 160mW
Pwer output consumption– 100VA
Dimensions – 32cm x 46cm x 44cm (does not include stand)
Weight – 9.10kg
Cooling requirements – Air cooled
Electrical requirements – 100V-240V

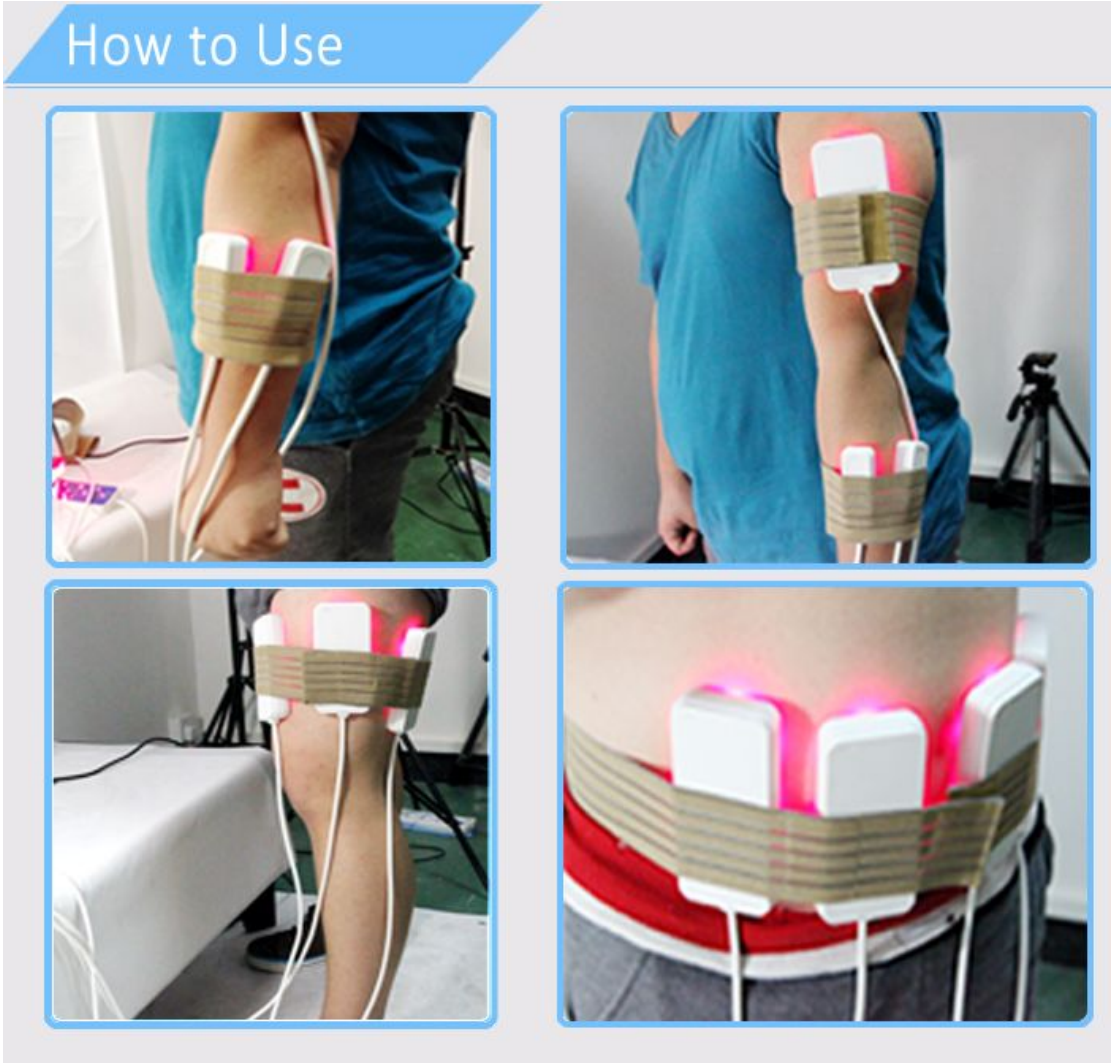
Mode of operation – continuous
Mode type:3 kinds
Environmental 10˚C to 30˚C Non-condensing
Requirements – Humidities below 75%RH

III. How to install the Accessories?

1. A & B are for four small pads, 4pin jet.
2. 1,2,3,4,5,6,7,8,9,10,11,12,13,14 are for eight large pads, 3 pin jet.
3. Push in the pads and install them. Press the push button and pull them out.
4. Plug in the power supply.

V. How to Put the Pads on Body?

1. Big pads for big body part such as belly, waist and etc. Small pads for small body part such as face.
2. Using the belts and adjust it in a proper place.
3. Insert the pads in and close them to the skin.

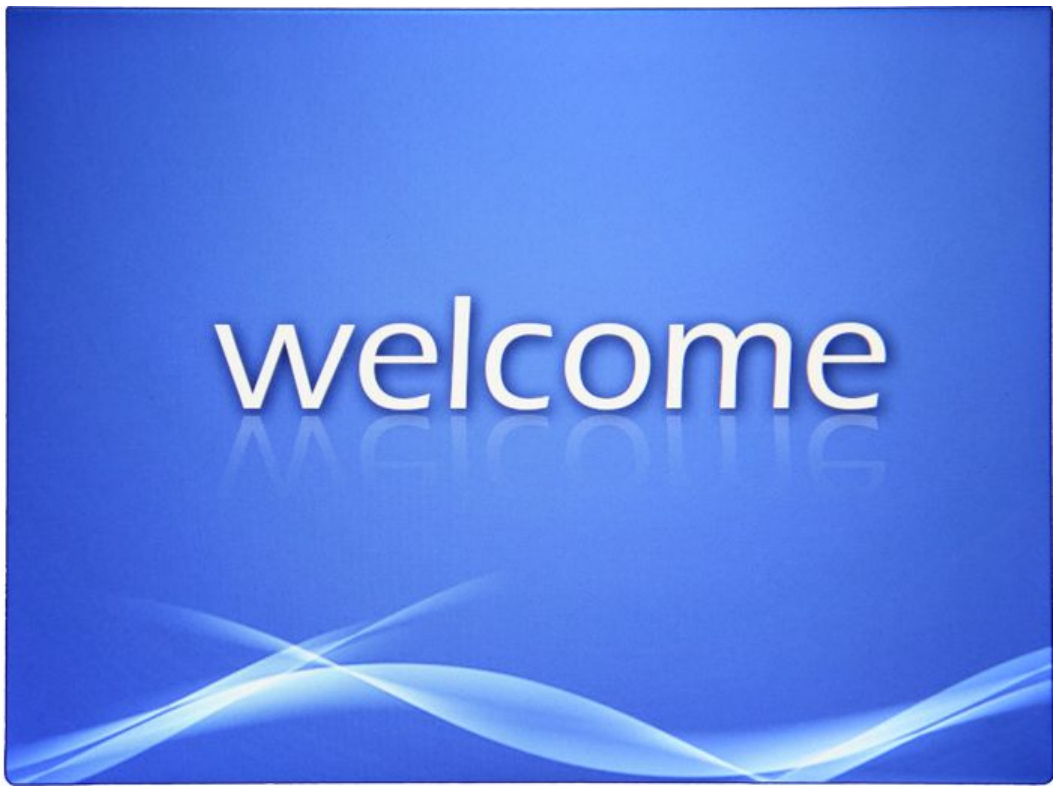


VI. How to Start the Machine?

Push the red power button,
push and switch the emergency switch, then you can start the machine.
On the contrary, push and switch the emergency switch, push back the red power button, then you turn off the machine.

VII. Program Setting

1. Start the machine, the screen will show “MYCHWAY”.



2. Click any place of the screen to enter into the main interface.

3. Choose treating part by clicking “Belly”, “Thigh”, “Arm” or “Face”.
4. Click“M1 Model 1” or “M2 Mode 2 ” or “M3 Mode 3”to choose treating mode, M1, M2, M3. (ps:Mode 1,Mode 2,Mode 3 means different wave modes, please chose the different mode to try then find out the best comfortable mode for you
Three modes are recommended for one treatment
4 Click “Timer” to setting time, click “Up” or “Down” to add or decrease time.
5 Click “Up” or “Down” to add or decrease energy. (If you want any pad does not work, set its energy to zero.)

5. Click to work or stop.

Caution:
We normally suggest that the intensity should be adjusted from low to high gradually. And recommended intensity level for big pads is 40-60% and 20-30% for small pads.

VIII.Accessory List

1 x Power line(We offer 100-240 V , AU/EU/UK/AU plug)
12 x Big paddle with 10 lasers diodes /each (Total120 lasers diodes)

4 x Small paddle with 2 lasers diodes /each (Total 8 lasers diodes)
2 x ABS holder for diode paddles
Note:the holder is not included in package

Chapter4: Maintenance

I. General Maintenance

1. After the treatment, please turn off the machine, laser pads and the power supply.

2. Use the dry towel clean the pads and the machine. Please do not clear this head by alcohol.
2. Put back all the parts in original place, at normal temperatures and pressure. Please do not stay in too cold, too hot, too dry and too wet.
3. Machine needs 30mins break after 2-3hr operating.
4. Everyday we do not think that 9hr Operating.
5. If it is not non-normal use and irresistible factors We offer Two years’ warranty for the units include the power, capacitor, touch-screen, and main board and inside the machine. And offer free repairmen, one to one exchange or return.
6. The Pads belong to consumable electronic products, we only have three hours

warranty and offer one to one exchange or return during the warranty period. To know more, please check our warranty card that come with the machine.

II .Troubleshooting

1. How many treatments will i need to see the results?
- You will see the results of the treatment periodically. Initially you may notice some minor changes. But normally We recommend 2 treatments per week for 8 weeks.

2. Can i have more than one area treated at one time?
- Yes if you are prepared to do more cardio vascular exercise.

3. Will the inches stay off after a treatment?
- Yes, if you follow our instruction, maintain a healthy diet and exercise routine.

4. Does the treatment hurt?
- No, it is a non-invasive treatment and here is no pain, bleed at all. But you may feel some heat because when it worked for a while.

5. Will i have to keep coming back to keep my results?
- Generally, one treatment per a single area is usually adequate to achieve the required

results. However, we recommend you more than 2 months of treatment for a better results. If the results are unsatisfactory there is the opportunity for repeat treatments. Because it depends on different body.

6. What is the difference between liposuction and Lipo laser?

- The procedure is similar to liposuction with some differences that may make Lipo laser a good alternative to traditional liposuction. Lipo laser essentially permanently removes your excess fat however without the suction removal of the fat. The body fat is dissolved or liquefied (turned into liquid) using a medical laser instead of suction.
